A Student's Guide to Staying Safe Online

I will **not** share any of my personal information.

Sharing your address, phone number, birthday and other personal information can mean you are at a greater risk of identity theft, stalking and harassment. This includes information you post on social media.

I will
communicate
respectfully!

I will use kind and polite words when
interacting online. I remind myself that
my “digital footprint” should be clean
and not contain any hurtful content.

I will be a responsible netizen.

1. Be wise in balancing your time spent online.
2. Find opportunities to have fun away from the screen!

≡ I protect my privacy!

01 I will always logout, once done with my online work. I will not share my login id and passwords with others.

02 I will keep my device safe and secure at all times.

03 I will access permitted websites on my device and will ask an adult if unsure about it.

I will inform and communicate well.

Let your teachers/ parents /elder brother or sister know about which websites you are visiting and which YouTube videos you are watching.

≡ Speak up and ask for help.

When things don't seem right, don't brush it away. Ask your parents, reach out to your teacher, or seek the help of your classmates.

Support will always be available as long as you ask for it.

I will be alert at all times!

I am against cyber bullying and I will say 'NO' to cyber bullies. I will tell if someone is being unkind or harmful on any sort of online chat platforms.

Staying safe online can be difficult, but it's definitely achievable!

I will create, share and collaborate online while staying SAFE AND CAREFUL as technology allows me to grow as a lifelong learner.
